

Blabberize

1. Go to <http://blabberize.com/> and log in. Click on MAKE.

2. Click on **Browse** to find your picture. Find your picture on the computer, select it and click Open.

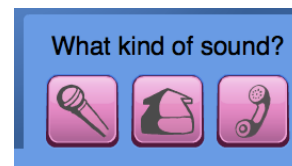

If you accidentally chose the wrong picture click on the icon of the face on the bottom left to upload a new image.

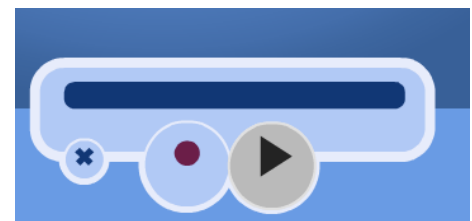

3. You can grab the pink balls at the corners to select the part of the picture you want to use.

4. Click on the blue arrow on the bottom right. Next, grab the mouth and place it where you want your mouth to go. Use the green and blue bubbles to form your mouth. When your mouth is complete click on the arrow on the bottom right.

5. In the next window select the microphone. A window may pop up asking you to Allow or Deny to use the microphone – Click on Allow.

6. Click on the red button when you are ready to record. The clearer you speak the more the mouth will move. When you are done recording click on the red button again. To hear your recording click on the blue triangle. If you made an error click on the blue X and start over.

7. If your mouth is not working click on the mouth icon and change the location or width. Then click on the arrow and record again.

8. When you are finished click OK. Then click Save. In the next window add a Title, Description, Tag, click on Private and then Save.

A blue window titled "Describe Your Blabber!". It contains the following elements:

- Title:** A text input field with the value "Rocky".
- Description:** A text input field with the value "Introduction".
- Tags:** A text input field with the value "dog,".
- Privacy:** Two buttons: "Private" (checked) and "Mature" (unchecked).
- Actions:** Two buttons: "Save" and "Cancel".

9. In the next window you can select to share your Blabberize by embedding it into a website or share the link. You can also have it converted into a video.
