

Tiki-Toki | Timeline Application

Getting Started.

Tiki-Toki is a web-based application for building interactive timelines, and is incredibly easy to use. In this tutorial, you will learn how to sign-up for a free account and embed images, text, and videos.

Note: A free account will only allow you to create **one** timeline. You will also not be able to host images on their server, but will instead need an external hosting site, like Flickr.

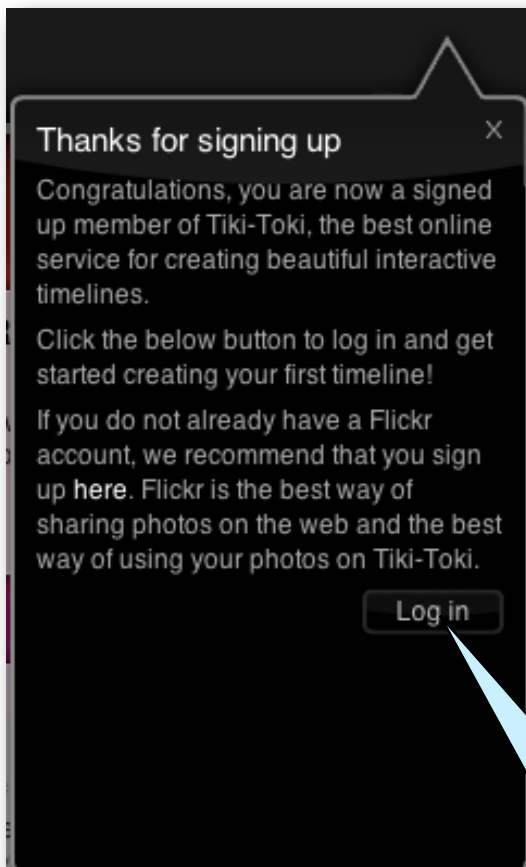

1. Go to the website: <http://www.tiki-toki.com>, click on “Free Sign Up” in the upper right corner.

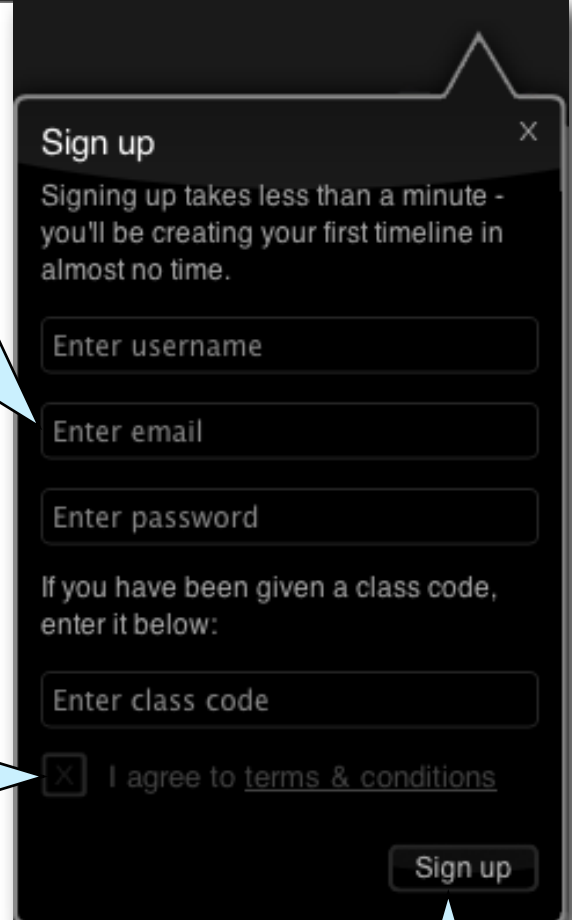

Getting An Account.

2. A dialog window will appear where you can enter your personal information and create a password.

3. Check this box to agree to the policy terms.

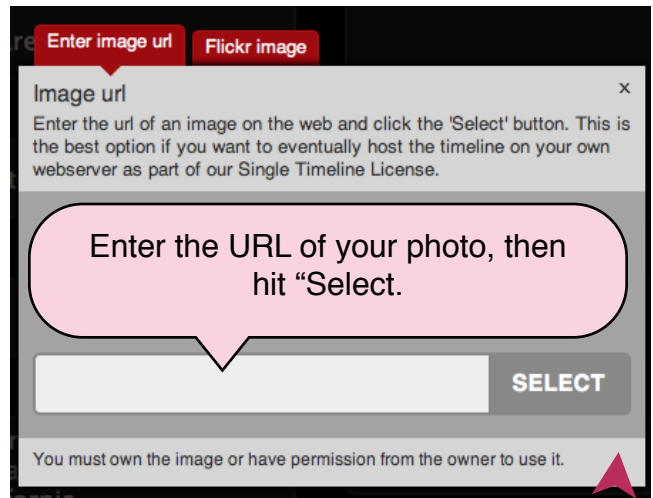

4. Click “Sign-up.”

5. Another dialog box will appear. Select “Log-in.”

Your First Timeline.

Choose a **title** for your timeline.

Add an **Intro Image**. It is also important to credit your photos.

Choose a **time range**
You can enter as MM/DD/YYYY (you do not have to input hour, minutes or seconds). Or, you can also click on the calendar icon for a visual display.

“Introduction” and **“About”** will appear as a dialog box when anyone first enters your timeline.

Create new timeline

The **background image** will appear as a wallpaper/backdrop behind your timeline.

You can modify the **color scheme**.

Click here to create your timeline.

Note: You can search for licensed photos on creativecommons.org.

The Toolbar.

Click on this triangle to open and close this "Admin" window.

+ CREATE NEW STORY	

Here you will see a list of stories on your timeline.

Click here to "Create a New Story."

Meeting my Suitemates

Basic info Story media Extra Info

Title: Meeting my Suitemates

Start date: 20 Aug 2010 22:12:13

End date: 20 Aug 2010 22:12:13

Intro: I met the other 7 girls I would be living with for the rest of the year.

Category: Undefined

Link:

Revert Save

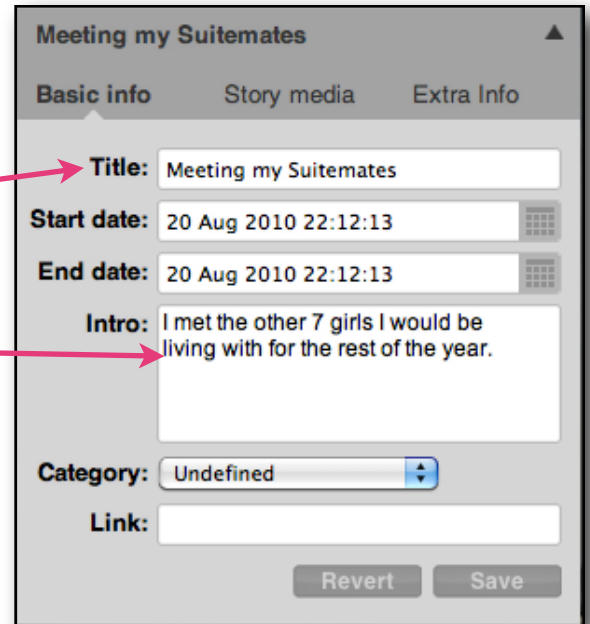

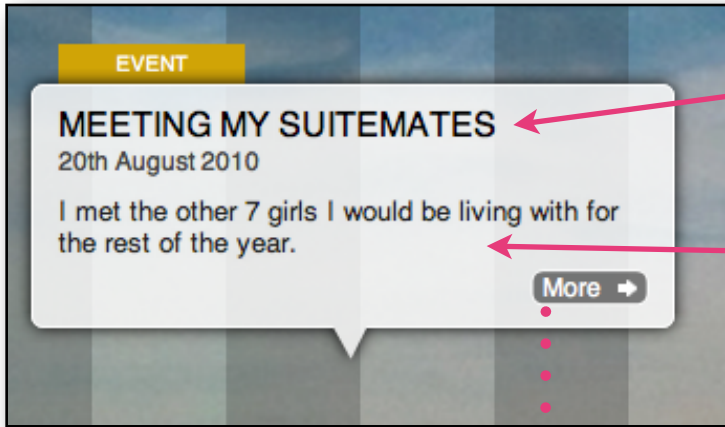

Intro is the brief text that will appear as a sub headline beneath the title. Your full story should be added under "Extra Info."

Click on 'Create a New Story' and a new section will appear (as pictured right) -- enter a title and it will automatically insert a start/end date depending on where you are on the timeline. You can manually change this information. Once you click "Save," you'll be able to add Story Media (photos, videos, etc.) and Extra Info.

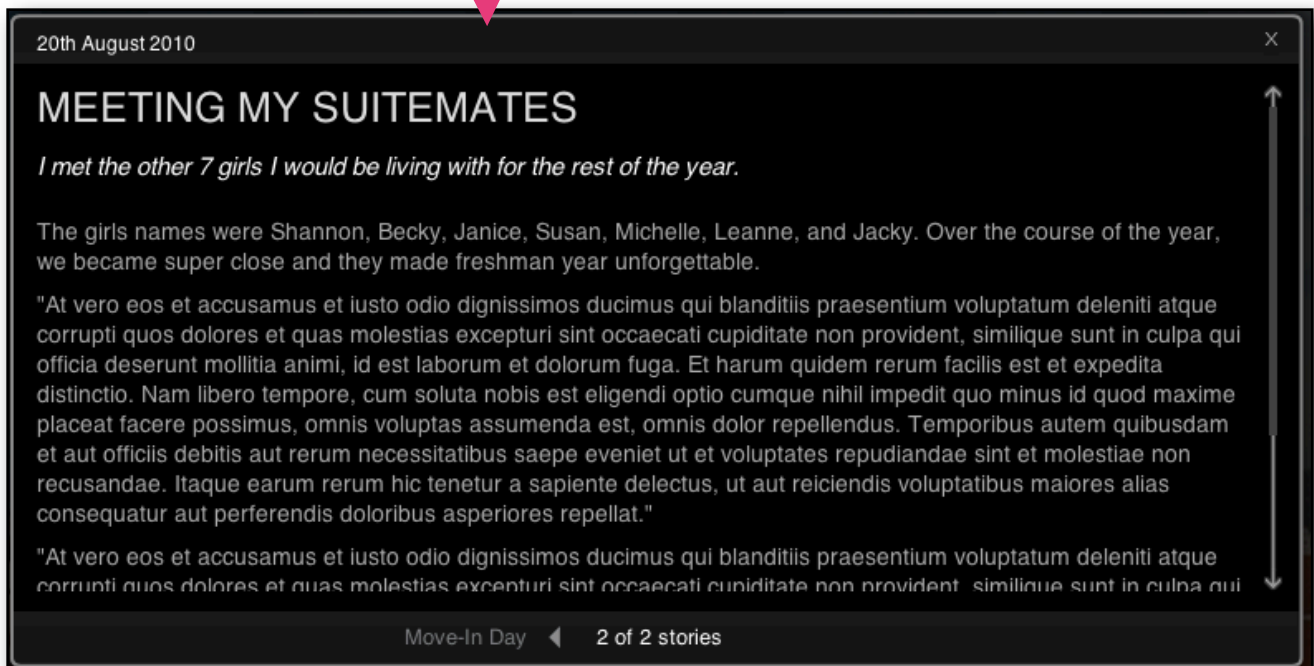

Extra Info: Story Media (photos, videos, etc.) and

Creating Content.

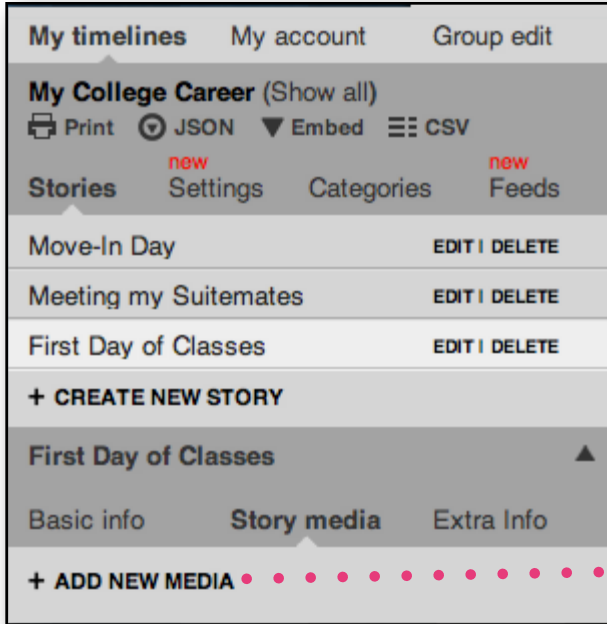

Clicking the "More" button will display the text that was included in "Extra Info."

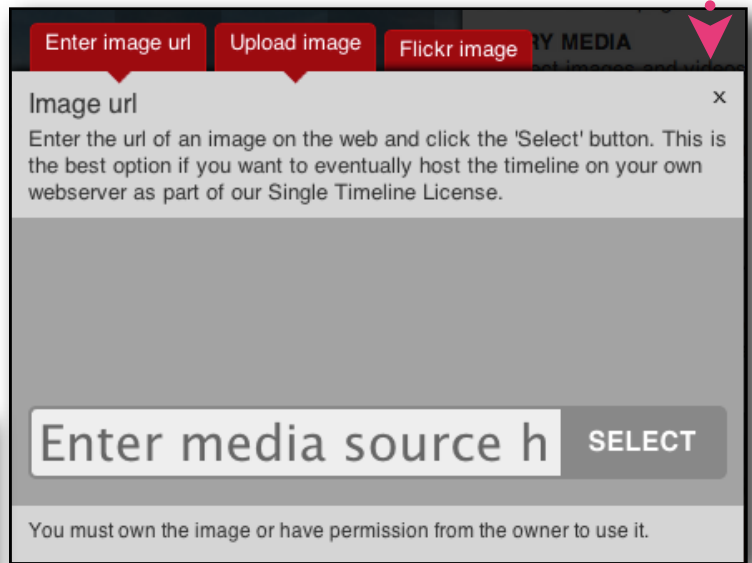

Adding images.

Click **“Add New Media”** on your story. This dialog box will then appear.

Enter the image URL, or you can also link your Flickr account for faster access. Again, with a tiki-toki pro account, you can “upload images” directly from your computer. For this free account, we do not have that option.

Once the image is selected, you can play with the the “Image Positioning” to modify how it appears on the timeline.

Adding Video.

Find the video on YouTube or Vimeo, and paste URL under "Source."

Choose "Video" under Type.

It will automatically create a thumbnail for you.

+ ADD NEW MEDIA

SEMESTER BEGINS

I boarded the MV Explorer for the first time in Nassau.

Getting There

The video will then be added to your timeline, where you can select "Play Video" to watch within your timeline.

With a pro account, you can also add audio files, including mp3.

Viewing Your Timeline.

It'll show the date that you're currently looking at on your timeline.

The Stories will hover over the background image and correspond to their associated dates.

Hover over the square box to click and drag -- this will change the view on your timeline. You can also click on the dots (which represent stories) to get to a section quickly.

You can also use your mouse to scroll across your timeline.

Posting your Timeline to WordPress.com.

1. Copy the **URL** of your tiki-toki timeline.

2. Take a **screenshot** of your timeline. On a Mac, press **Command + Shift + 4**, let go and then your cursor will become a crosshair where you can select the boundaries. On a PC, use the "Print Scrn" button. This will save a photo to your desktop.

3. Sign onto WordPress.com and click on **New Post**.

4. Give your post a **title**.

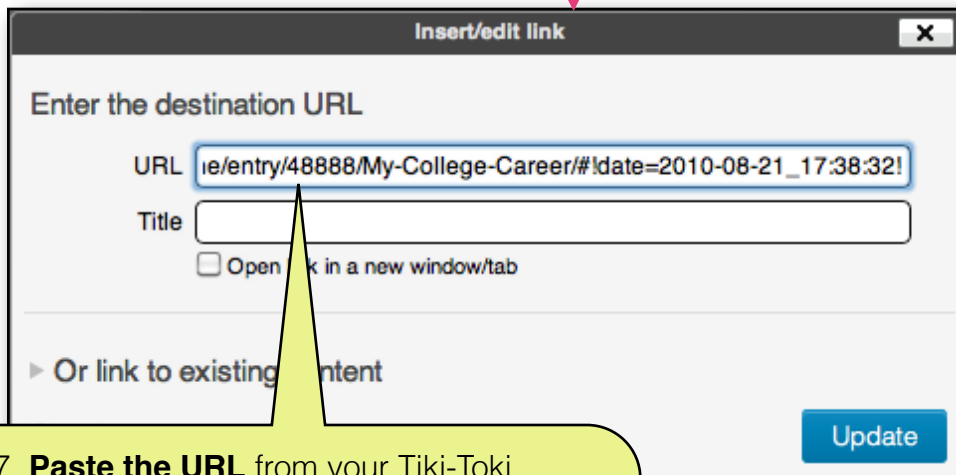

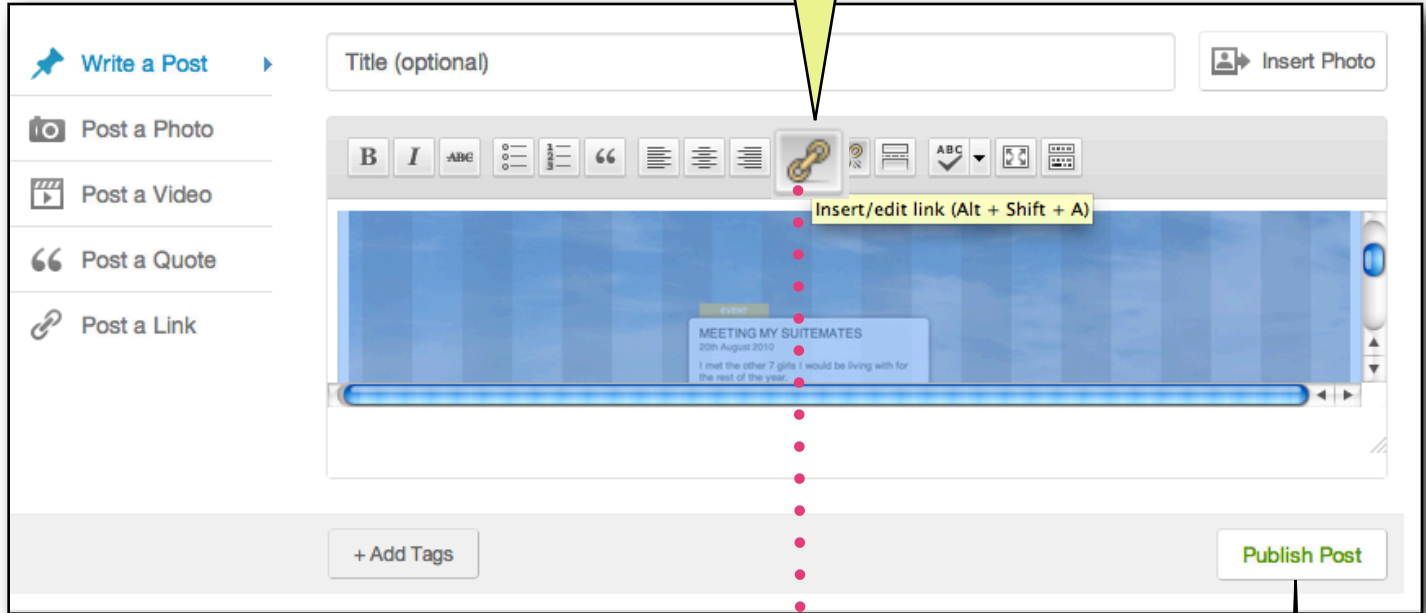

5. Click "**Insert Photo**." Browse for the screenshot on your desktop, then select "Open." Your timeline photo will then be uploaded.

The screenshot shows a Tiki-Toki timeline entry for "MEETING MY SUITEMATES" on August 20th, 2010. The entry text reads: "I met the other 7 girls I would be living with for the rest of the year." Below this, the WordPress.com "Write a Post" interface is shown, featuring a title field, a rich text editor with various formatting options (bold, italic, text color, background color, link, unlink, list, quote, code, media), a "Post a Photo" button, and a "Publish Post" button.

Tiki-Toki | Timeline Application

6. Click on the **link** button.

7. **Paste the URL** from your Tiki-Toki timeline into the field and click Update.

With a pro account subscription, you can embed your timeline directly to your site, in addition to hosting your media on their server.

8. Now click on **Publish Post** and your timeline is now linked to your WordPress.com site!
